Product Manager,
Amazon

100+ MENTORS **FROM** **20+** UNIQUE INDUSTRIES/
FUNCTIONS

The continuity with one mentor for four weeks made it far more engaging than any other program I've attended.

- Aahana, Lotus Valley International School, Noida

Real Stories | Real Skills | Real Impact

Learning by Doing

It gave me hands-on experience in consulting – from research to pitching – something we don't get to do in a classroom.

- Devansh, Overseas Family School, Singapore

Future-Ready Skillset

I improved critical skills – research, teamwork, and professional presentations – that apply to any career.

- Diya, Indus International School, Pune

Prepared for the Real World

This internship gave me life skills I can use beyond school – a lot of which can be implemented in real life.

- Jaskirat, The British Co-Ed High School, Patiala

Career Exploration & Clarity

GradCircle helped me clear my doubts about career options. You think something isn't for you, but after trying it, you realize it is.

- Avni, St Constantine's International School, Tanzania

Real Industry Exposure

Corporate and international law now excite me far more than I imagined before starting this program.

- Aviraj, Mahindra United World College, Pune

Bridging Classroom & Career Choices

My interest in finance peaked here. It felt more real than just studying in class – school only teaches theory, but this showed me what the career actually involves.

- Alisha, Calcutta International School, Kolkata

Trusted by Students from 100+ Schools Globally

I loved building our own brand and creating a detailed investor pitch- it felt like the real world.

- Laavanya, The British Co-Ed High School, Patiala

Sample Projects

Below are examples of real-world problem statements students have tackled, fostering creativity, critical thinking, and industry-relevant skills.

- ✓ **Market Expansion:** Develop a strategy for an Indian electric scooter brand to enter Southeast Asia.
- ✓ **Equity Research:** Analyze a listed company and recommend a buy, hold, or sell rating with supporting valuation.
- ✓ **Healthcare Innovation:** Create a market-entry plan for a next-gen prenatal screening test in India.
- ✓ **Litigation Strategy:** Design a courtroom advocacy plan for a public interest case.
- ✓ **UX Redesign:** Improve user experience for a wearable fitness device through interface and feature innovation.
- ✓ **AI for Social Good:** Build a fake news detection and sentiment analysis system for social media.
- ✓ **Investigative Journalism:** Uncover the truth behind “healthy” food labels through data and regulatory analysis.
- ✓ **Policy Review:** Evaluate the effectiveness of a government employment scheme introduced 5 years ago.
